### ▲ Parapan®

Shiny black Parapan® has been used to build sleek black cupboards in direct contrast to the natural wood table, creating a modern contemporary feel in an otherwise traditional meeting room at Schroders, a global asset management company in London. Solid high-gloss acrylic Parapan® is dramatically more durable than lacquers and other finishes. The colour runs all the way through and never fades; it is a waterproof and repairable material. *enq 170*

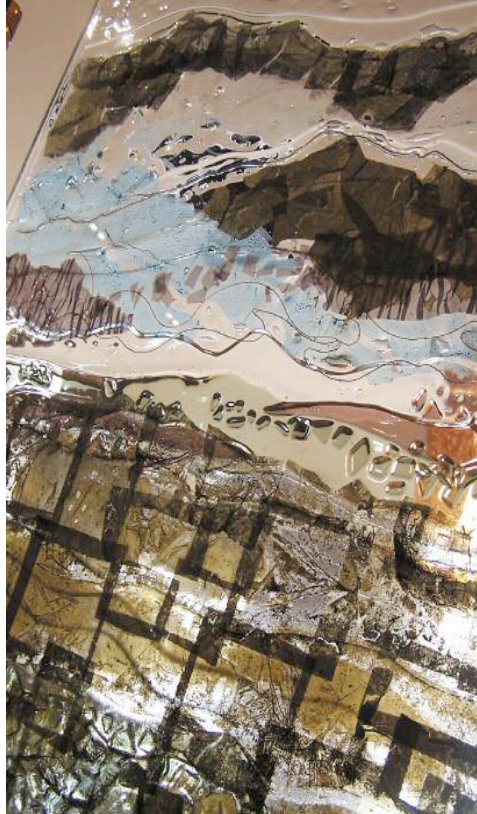

### ▲ Sven Christiansen

Sven Christiansen have expanded the range of desk-mounted screens offered with their Juice bench desking with the addition of screens double-glazed in frosted Perspex\*. In addition to its distinctive desk-mounted screens, Juice desking features sliding tops, power towers and comprehensive cable management as standard. *enq 173*

### ▶ Omarno

Omarno Palm Panel Flex and Mosaic are 100% hand made using coconut shell which is a utilised industry by-product, making it ecologically friendly. The surface seamlessly allows each edge to interlock into the next, providing a continuous flow of flexible texture. The innovation of this beautiful material combines the best of modern technology and nature, giving an opportunity to make a quality sustainable choice that is completely free of formaldehyde. *enq 174*

### ▶ Bellissimo Furniture

Bellissimo Furniture has launched Benif, a decorative surface which allows an incredible range of designs and textures to be applied to surfaces on site. Suitably trained fitters can use Benif to create remarkably authentic finishes of all descriptions - from woodgrain to metallic, and from stone to floral fabrics. Benif is suitable for numerous commercial interior applications, such as hotels, bars, shops and office receptions. *enq 172*

### ▶ Julie Langan

Julie Langan Glass recently completed a series of glass panels for the prestigious Westport Plaza Hotel situated on the west coast of Ireland. Each panel of glass, measuring in excess of one metre in size, was laminated onto toughened glass to comply with safety regulations and installed on site using bespoke brass hardware designed specifically for each piece of glass. *enq 171*
